WHAT IS BABY/CHILD MASSAGE AND YOGA ?

Massage is a wonderful and special gift that parents can share with their babies. Baby massage is an ancient art used in many diverse cultures to help with a variety of physical and emotional needs and to promote relaxation. Babies crave skin contact. Touch is a baby's most developed sense at birth and through it a parent/carer can communicate love, security and trust to a baby immediately. Everyone has the ability to touch and massage another. Baby massage is simply a method that helps to reinforce the natural power of touch.

Baby massage allows parents to understand their babies subtle non verbal language and develop their ability to listen to their baby through the creation of a special intimate time together. When a baby is massaged, the foundations of trust and security are laid down which can help build a happy and confident relationship.

Specific benefits for parents and babies include:

Baby massage can help relieve wind, colic, constipation, teething and much more

Baby Massage may help create and develop the bond between parents and babies.

Baby Massage provides relaxation for parent and baby.

Baby Massage stimulates and supports a baby's physical, emotional and social development

Baby Yoga introduces parents and babies to gentle stretches to help release tension from the body and relax the mind. Classes combine yoga movements, music and massage to create a class designed to support babies development and help parents feel confident handling their babies.

Baby Massage and yoga are great fun to learn and a brilliant way to bring parents and babies together in a supportive environment.

We also offer courses to help support parents before birth with our Blossom & Berry Baby Confidence Classes, pregnancy massage plus courses to work with older children with our Story Stretch and Positive Touch courses.

We have foundation courses in baby massage and yoga and also post graduate and CPD courses which you can study with us regardless of who you initially trained with.

Why learn baby massage with Blossom & Berry?

- 1 Relief**
Baby massage can help relieve a variety of health issues for babies such as colic, dry skin, teething pain and nasal congestion.
- 2 Relaxation**
Baby massage releases relaxation hormones which activate the body's relaxation responses.
- 3 Stimulation**
Baby massage boosts circulation to the tissues of the body and stimulates all baby's body systems.
- 4 Bonding**
Baby massage uses touch, the release of oxytocin, eye contact, singing and smell to help nurture bonding.

FREQUENTLY ASKED QUESTIONS

THESE QUESTIONS RELATE MAINLY TO THE BABY MASSAGE AND YOGA DISTANCE LEARNING DIPLOMA.

WHAT IS REQUIRED AS PART OF THE DISTANCE LEARNING PROGRAM?

BABY MASSAGE AND YOGA DIPLOMAS

You will be required to study the modules, watch the films and do further reading. At the end of each module there are some short answer questions which you will need to answer and send to Blossom & Berry by email for marking. Once the module has been submitted and marked you can move onto the next module. There is no time limit on how quickly you study the modules but you must complete the whole course within 12 months of enrolment.

When you have completed the last module on your course you will be required to organise and teach a baby massage or yoga course to a group of 3 or more parents. You will need to write up these teaching sessions and send evaluations from the parents as evidence.

Once all modules and case studies are completed and marked then you will receive your diploma and can begin to practice as a professional Blossom & Berry Baby Massage or Yoga Instructor.

HOW WILL I STUDY THE COURSE?

When you access a Module, please print it off and/or have the online version open on your computer as we have sent up links from the modules to various websites on the internet for further research and for visual learning.

You should also watch the mini lectures online relevant to each module to help expand your knowledge.

Please do read into your subject and buy some of the suggested books on the reading list. Some of the questions from each module will require you to research your subject in more detail than just provided in the notes.

WHAT ARE THE BENEFITS OF HOME LEARNING?

You can learn at your own pace allowing flexibility. Instead of intensive teaching you will have time to absorb the information and form your own opinions. The cost of training is also reduced as you do not have to travel or stay away from home.

Our Skype option brings the best of in person training and distance learning together.

WILL I MISS OUT ON PROFESSIONAL TUITION LEARNING AT HOME?

No, Gayle has designed the course materials to be in depth. The course also provides online footage and summary lessons if you prefer a more visual style of learning. Courses come with footage of teaching actual classes, one to one private sessions and routines.

Our Skype option allows you to access Gayle's highly recommended teaching style in your own home at a time which works for you. Skype can be booked by the hour and costs £30.00 per hour.

If you would like to book a private study day with Gayle to reinforce your knowledge of any aspect of the course this is possible at the cost of £150.00.
